SKILLS

Front End: TypeScript, React, Next.js, Tailwindcss, Redux, React-query, Zustand

Back End: Node, Express, MongoDB

Others: Git and GitHub, Notion, Figma, Linux

PROJECT

Amader Bazar | Live   Source Code: Front End   Back End

The project is an e-commerce/online store that sells various products and allows customers to browse, purchase, and track their orders.

- At first, it was built with React.js, then migrated into next.js 14 app router. Optimized and made SEO-friendly
- Encountered data fetching issues with RTK Query and next.js cache update and revalidation and validated Forms and requests.

Rimas Dental | Live   Source Code: Front End & Back End

A user-friendly website for dental clinics, built on top of the nextjs app router, API route, and server action for the back end.

- Internationalization with Bangla and English language support
- Patient and Doctor authentication and authorization
- Including facilitating patient appointments and user, service management with insightful analytics and intuitive dashboards for doctors
- 90+ lighthouse score for SEO, Best Practice, Accessibility, etc.

TRAINING

Think in a Redux way – [**Certificate**]

Reactive Accelerator – [*Running*]
